FINAL MAGNETIC SEPARATION DEVICES for REMOVING FERROMAGNETIC and WEAKLY FERROMAGNETIC PARTICLES from FOOD PRODUCT STREAMS

ABSTRACT; This voluntary consensus standard describes the minimum requirements for final magnetic separation devices for use in the food industry. Final magnetic separation devices are magnetic separation devices which are designed to be installed at the last possible point in a food handling process. The standard specifies materials which may be used to manufacture these devices, design requirements for the devices and requirements for coverage of product stream. The configuration and performance of the magnets within the device are specified, along with methods for determining magnet strength and requirements for test instruments.

Purchaser Name _____ (Block Letters)
The purchaser's name will be printed on each page of the standard. NB Must be an individual not a company

Payment
